

AF Waterlabel Series 14

AF Series 14 is a high pigmented water-based ink for flexo printing, suitable for all papers and topcoat films.

The series has high brilliance and an excellent processability, with excellent runability and ensures a high quality print results with very good dot sharpness.

Storage	Additives	Production
Storage stability in original packaging when stored between 15° and 25°C is 24 months.	9002 AF Retarder 9006 AF Thinner 9240 PR Antifoam 2400 RS Cleaner 2000 RS Cleaner for printing plates	Colour Mixings from PANTONE® or from a colour sample are produced from 5 kg

¹ Outdoor use can reduce the lightfastness.

² Suitability for hot stamping and printing with thermal transfer tapes should be tested under realistic conditions.

³ Corona-pretreatment of the substrate is recommended.

⁴ For printing on films our Polylabel-Series is recommended.

⁵ For printing on thermal paper our Thermolabel-Series is recommended.

The information contained in this leaflet are intended as guidelines. They are based on experience after thorough testings in the laboratory and testings under realistic conditions. The contents are not legally binding.
