

Colorlabel

Colorlabel is a Heatset ink, developed for the printing on adhesive materials like paper and film. Colorlabel dries with heat (hot air dryer), working reel-to-reel is possible without blocking.

Colorlabel is available in 2 series:

- Colorlabel P (CLP) for printing on all papers
- Colorlabel F (CLF) for printing on all non-absorbing materials like Hard- und Soft-PVC, aluminium-vaporized material, PP, PE.

Storage	Additives	Production
Storage stability in original packaging when stored between 15° and 25°C.	9200 PR Drying Agent 9069 PR Colorgel 1600 PR Anti Drying Agent 1210 PR Cleaner	Colour Mixings from PANTONE© or from a sample are produced from 1 kg (please send substrate).
Packaging	Safety data sheet	Hazardous Substances Statement
1 kg Tin	Safety data sheet on request	See safety data sheet

¹ Outdoor use can worsen the lightfastness.² Suitability for hot stamping and printing with thermal transfer tapes should be tested under realistic conditions.³ Corona-pretreatment of the substrate is recommended.

The information contained in this leaflet are intended as guidelines. They are based on experience after thorough testings in the laboratory and testings under realistic conditions. The contents are not legally binding.
